SOFTWARE APPLICATIONS

Choose DEVELOP

Many everyday office jobs – printing, copying, scanning or managing documents – are routine tasks. But they often take up lots of time and effort. Time that could be better spent doing other things. The best way of saving time in document production and management is to simplify and automate work processes. That is precisely what the wide range of software applications DEVELOP offers can do for you – while at the same time making your office life simpler.

Document management made easy

By digitising paper documents and then automating and efficiently managing your document workflow you can boost office productivity. DEVELOP's document management software tools have been designed to achieve this goal.

System individualisation for enhanced efficiency

Tailoring office devices to the users' specific needs is good for your business. That's because system individualisation speeds up work procedures and streamlines office workflows. DEVELOP offers you various software tools to individualise your ineco systems.

Mobile solutions ensure on-going connectivity

Mobile workplaces are becoming increasingly common. Unfortunately, connectivity problems between tablets or smartphones and office devices are as well. That's why DEVELOP offers simple-to-use software tools that make convenient mobile printing possible.

Managing print jobs to improve results

As printers become more sophisticated with ever more functions, managing print jobs easily and effectively has become increasingly business-critical. DEVELOP's software applications portfolio contains a wide range of tools to facilitate print job and colour management.

Simplified system administration

How can office devices be efficiently and conveniently administered in your networked environment? Software tools from DEVELOP ensure you or your network administrator can easily manage devices, control costs, keep data secure and enjoy remote support.

User authentication puts you in control

Designated user access and user accounts help you control who prints what and where, while preventing documents from falling into the wrong hands through unauthorised access to office devices.

Accounting facilitated

Printing costs can escalate if no controls are in place. DEVELOP has software tools to help you keep those costs under control – at all times and for all users.
