Monochrome printing | ineo 226

The compact flexible solution for small to mid-sized offices

DEVELOP launches A3 monochrome ineo 226

Langenhagen, April 2016 – Even in small offices there will always be room for the new ineo 226 with its compact footprint. This A3 monochrome multifunctional device from DEVELOP has been designed to meet the document needs of small to mid-sized businesses or workgroups. The flexibility, broad functionality and ease of use that characterise the ineo 226 are precisely the qualities today's office users appreciate.

"A multifunctional office device that is easy to use, works reliably and offers a wide range of functions is the ideal solution for almost all the print jobs a small to mid-sized business or workgroup needs," says product manager Jürgen Dobbrunz: "The flexibility of the new ineo 226 in printing, copying and colour scanning together with its good eco profile will make it an invaluable asset in such offices."

Ideal for teams

Office teams will benefit from the flexible paper capacity, which if required, can be increased to a maximum of 1,350 sheets. That way, the frequent interruptions in work routines caused by the need to restock a printer will be a thing of the past. By printing and copying at 22 ppm in A4 and 8 ppm in A3 the ineo 226 is also fast enough to meet the document requirements of small to mid-sized teams. The device's flexibility is also evident in the wide of media it can deal with. Up to five paper trays and sources can be filled with different kinds of paper. What's more, the duplex printing option can help to save paper in teams with relatively high printing volumes.

Diverse scanning functions

Besides offering TWAIN colour scanning as a standard feature, the ineo 226 can optionally send scans to a variety of destinations, e.g. e-mail addresses, an FTP server or an SMB. Thanks also to the standard scan-to-USB function, users can easily meet any last-minute document or presentation requirements by scanning straight from the ineo 226 onto a USB stick. The optional duplex document feeder brings additional convenience in more voluminous copying and scanning jobs, which can be completed fast thanks to scanning speeds of up to 46 ipm and automatic double-sided processing of documents.

Environmentally sound

The ineo 226 is certified to the Blue Angel and Energy Star eco label standards. This certification is based not least on its low overall energy consumption and the ineo HD toner that is partly made from biomass. The various power-saving features also mean that the ineo 226 is economical to operate.
